MINUTES OF MEETING OF PROGRAM PROJECTION COMMITTEE ON COMMUNITY SERVICES  
February 14, 1956

Present -- C. C. Lang, Chairman; Catherine Beauchamp, Ed Callahan,  
Otto Croy, Ev Niederfrank, Ruth Hodgson, Ward Porter,  
Neil Raudabaugh, Lloyd Rutledge, Helen Turner

Chairman C. C. Lang called the meeting of the program projection committee on community services to order. He called upon Neil Raudabaugh to present the revised basic assumptions about community services. The committee modified slightly the five-point report and accepted it for return to the basic assumptions committee.

Mr. Croy then explained the current plans of the program projection steering committee. He invited the community services group to provide materials developed so far for use at the regional meetings of directors beginning March 7 and 8. Mr. Croy suggested the committee provide information for action at the local level to improve each community service. This concept of committee role lessens concern of duplicating the work of other committees, such as the one on recreation.

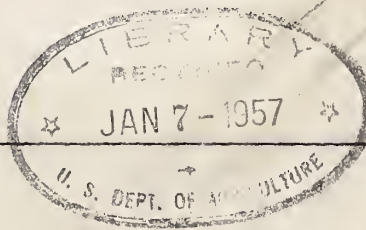

C. C. Lang presented a proposed list of chapter headings for the final report. The committee wished to keep an adequate number of chapter headings and sub-headings to enhance readability. Subcommittees are responsible for figuring out exact titles for each chapter.

Ed Callahan, chairman of the subcommittee on listing specific community services, reported on the "Illustrative List" developed by his group. His detailed outline of services was accepted.

Catherine Beauchamp's subcommittee reported on "Questions and Answers on Some Facts and Trends on Health Services." She developed the report in question format, giving an outline of facts, changes, and future problems. The report included a bibliography for county use. The committee liked the report. More will be included in it on safety, school health, and general accepted standards for each health service.

A "Tentative Outline of Community Services" came from Lloyd Rutledge. His report also included a table on projection of elementary, secondary and higher education enrollments, public and nonpublic. The committee suggested more be included on schools as community centers of adult education and trends in consolidated schools and libraries.

(more)

AEP-33 (2-56)  
Ruth Hodgson

Transportation and communication services were reviewed by Ed Callahan. The group discussed the form his report is taking.

The next meeting of the program projection committee on community services is set for February 16, 1:30 to 3:30 p.m., room 3140. Discussion of service area reports will continue then.
